

MAKE YOUR OWN Tree Identification Wheel

1. Print this page. Use stiff paper if you can.
2. Cut out the two large wheels.
3. On the small wheel, cut out the small triangles.
4. Fasten the small wheel on top of the larger wheel with a paper fastener or thumbtack.

Find a leaf in your yard or the woods and match it to one of the pictures. Turn the wheel until the colored triangles on both wheels match.

Can you find the match on this wheel?
(to see the answer, turn the paper upside down)

Quaking Aspen

A cork or short stick keeps the wheels together and makes a nice handle.
